M. Yuvaraj

Data Analyst | Healthcare & E-Commerce Analytics

Chennai, Tamil Nadu | +91-9342131036 | yuvarajkmurugan@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 5 years of experience in Healthcare and E-commerce analytics, specializing in Advanced SQL, Power BI (DAX, Data Modeling), Tableau, and Python for data processing and analysis. Experienced in handling 10M+ record datasets, building KPI frameworks, and developing executive dashboards to support strategic decision-making. Strong expertise in healthcare claims analytics, statistical analysis, and business performance optimization, delivering actionable insights from complex datasets.

TECHNICAL SKILLS

- Advanced SQL (Joins, CTEs, Subqueries, Window Functions, Query Optimization)
- Power BI (DAX, Data Modeling, Star Schema, Power Query, Dataflows, Power BI Service, Gateway)
- Tableau (LOD Expressions, Parameters, Calculated Fields, Dashboard Development)
- Python (Pandas, NumPy, Data Cleaning, ETL, Data Validation Scripts)
- Databases: MySQL, Relational Database Management Systems (RDBMS)
- Data Warehousing Concepts, ETL Pipelines, Large Dataset Handling (10M+ Records)
- Statistical Analysis (Hypothesis Testing, A/B Testing)
- Business Intelligence, KPI Reporting, Executive Dashboarding

WORK EXPERIENCE

Data Analyst | EBOT Technosoft Pvt. Ltd. | Mar 2021 – Present

Project 1: Imobisoft

Duration: Sep 2023 – Present | Domain: Healthcare Analytics

- Designed and optimized star-schema Power BI data models integrating claims systems, provider directories, eligibility files, and member databases.
- Processed and validated 10M+ healthcare claims records ensuring data accuracy and HIPAA compliance.

- Developed 15+ interactive Power BI dashboards tracking Claims TAT, denial rates, readmissions, provider performance, and cost trends.
- Built reusable DAX measure libraries for YoY, MoM, rolling averages, and benchmark comparisons.
- Implemented SQL and Python-based data validation frameworks to detect anomalies and duplicates.
- Performed hypothesis testing and regression analysis to evaluate healthcare program effectiveness.
- Identified high-cost procedures and fraud indicators supporting cost containment strategies.
- Designed and implemented recurring reports using Power BI Service, reducing manual reporting effort
  Documented data models and transformation logic for governance and maintainability.

Project 2: Burst Digital
Duration: Mar 2021 – Aug 2023 | Domain: E-Commerce Analytics

- Designed end-to-end Tableau dashboards integrating sales, customer behavior, subscription, and inventory datasets.
- Performed advanced SQL querying (CTEs, window functions, subqueries) on 5M+ transactional records.
- Built KPI frameworks for revenue trends, customer retention, subscription performance, and product profitability.
- Developed advanced Tableau calculations using LOD expressions and parameters.
- Conducted cohort analysis and A/B testing to evaluate marketing campaign effectiveness.
- Identified underperforming SKUs enabling inventory optimization strategies.
- Designed and implemented ETL workflows using Python (Pandas) and Tableau Prep.
  Collaborated with marketing and supply chain teams to drive data-backed decision making.

EDUCATION

B.E. – Computer Science & Engineering
Ganadipathy Tulsi's Jain Engineering College, Anna University
2013 – 2017
